

Sams Creek Mining Permit Application Declined

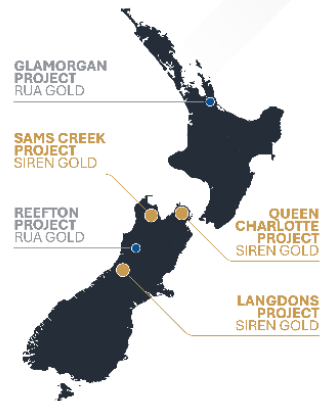

Siren Gold Limited (**ASX: SNG**) (**Siren** or the **Company**) advises that its subsidiary, Sams Creek Gold Limited's (**SCGL**) application for Minerals Mining Permit number 61324.01 in relation to Sams Creek has been declined by NZPaM.

The Company notes that the **Sams Creek Exploration Permit (EP40338) expired at completion of its term on 25 March 2026**, with the Minerals Mining Permit application keeping the Company's interest in the Sams Creek Project live.

The Company is reviewing the decision and assessing the options available to it, including any potential right of appeal, following receipt of the decision. If the land becomes available for permitting again, the decision does not preclude the Company from applying for a further permit, provided the requirements of the *Crown Minerals Act 1991* (NZ), the regulations and the *Minerals Programme for Minerals (Excluding Petroleum) 2025* (NZ) are met.

The Company's other projects remain unaffected and continue to progress in line with previously announced plans, although this development will facilitate an increased focus on and directing of resources to these projects.

The Company will provide further updates as additional information becomes available or as material developments occur.

Authorised by the board of Siren Gold Limited.
